SUMMARY

I build growth strategies, marketing organizations, and the technology that powers them. After twenty years leading marketing for startups, I taught myself AI engineering so I could build the systems I had spent my career wishing existed.

I'm a growth and product marketing executive who combines twenty years of commercial experience with hands-on AI application engineering and systems architecture. I translate complex products into stories people understand, build the systems that acquire and retain customers, and use evidence to determine what actually works.

I also design and build proprietary marketing technology, including multi-agent AI systems, Bayesian statistical analysis, behavioral modeling, and software that connects research, strategy, execution, and measurement. I don't just recommend technology solutions. I can engineer them.

Strongest in: early-stage growth, go-to-market strategy, product marketing, category creation, customer acquisition, B2B SaaS, DTC, behavioral psychology, and AI-powered marketing systems.

PROFESSIONAL EXPERIENCE

Growth Bastards | Founder & Fractional CMO

New York, NY | Oct 2023 - Present

Marketing and technology organization combining senior marketing leadership with proprietary AI systems, statistical analysis, and specialized agentic workflows.

- Lead go-to-market strategy, positioning, customer acquisition, conversion optimization, and marketing operations for early-stage companies across SaaS, fintech, Web3, and DTC.
- Architect and direct an agentic marketing organization of fourteen specialized AI agents (software, not staff) under my leadership as human CMO, combining marketing expertise, coordinated execution, shared knowledge, and persistent operational context.
- Develop proprietary technology for behavioral research, account-based marketing, Bayesian advertising analysis, AI orchestration, and automated regulatory review.
- Savvly (longevity-focused fintech): developed category positioning and go-to-market strategy. Engineered an AI compliance analysis system designed to evaluate financial marketing content against applicable SEC advertising requirements.
- Apply statistical analysis, causal reasoning, experimentation, and commercial performance metrics to marketing decisions.

Realware LLC | Director of Marketing

New York, NY | Feb 2023 - Oct 2023

Senior marketing leader for a B2B software company, responsible for acquisition, conversion, customer engagement, and retention.

- Increased MQL-to-demo conversion 41% through redesigned CRM workflows, product-informed segmentation, and improved marketing-to-sales processes.
- Reduced customer churn 17% by rebuilding onboarding communications and retention-stage engagement.
- Led paid acquisition, SEO, content, and product marketing. Implemented GA4 and PostHog analytics to improve performance visibility and experimentation.

Point Pickup | Director of Product Strategy New York, NY | Apr 2022 - Dec 2022

Product strategy leadership for a technology platform connecting logistics capabilities with commercial customer needs.

- Translated complex customer and marketing requirements into actionable product specifications and engineering priorities.
- Worked across product, engineering, and commercial functions to align product development with market requirements, business objectives, and operational dependencies.

Savvly | Marketing Director New York, NY | Jun 2021 - Mar 2022

Pre-launch marketing and product leadership for an early-stage financial technology company developing longevity-focused financial products.

- Developed the investor narrative, category positioning, go-to-market strategy, and marketing materials supporting a $1.2 million seed financing.
- Created foundational marketing, communications, positioning, and product documentation from the ground up.

Michelle's Maccs | Chief Marketing Officer New York, NY | Apr 2019 - May 2021

Led marketing strategy, customer acquisition, and brand development for a direct-to-consumer e-commerce business.

- Scaled the business from launch to a $1.8 million annualized revenue run rate through paid social, email marketing, influencer partnerships, and conversion optimization.
- Achieved customer acquisition costs approximately 30% below category benchmarks while maintaining a repeat-purchase rate above 40%.
- Built the marketing organization from the ground up, directing acquisition strategy, brand positioning, creative development, and customer retention.

Omega One (ConsenSys) | Chief Product Marketing Officer New York, NY | Mar 2018 - Dec 2018

Product marketing and organizational leadership for a blockchain trading technology company.

- Recruited and expanded the product team from four to twelve, coordinating engineering, UX, product design, and product management.
- Translated complex blockchain technology into clear commercial positioning and institutional customer messaging.
- Introduced structured product-development practices and assumption tracking to improve cross-functional decision-making.

DirecTech Labs | Head of Product Marketing 2017 - 2018

- Translated machine-learning technology into commercially understandable B2B product positioning, messaging, and demand-generation programs.

Startup Ecology | Startup Product Marketing Specialist 2011 - 2017

- Advised more than 130 startups on product-market fit, customer acquisition, positioning, and business growth through accelerator programs associated with Wix and WeWork.

PROVEN RESULTS

- $1.8M annualized revenue: scaled a DTC brand from launch to a $1.8 million annualized revenue run rate in under 16 months, with customer acquisition cost approximately 30% below category benchmarks and a 40%+ repeat-purchase rate.
- +41% MQL-to-demo conversion: B2B SaaS, through CRM redesign, improved segmentation, and rebuilt engagement systems. Reduced customer churn 17%.
- 500% growth in six months: helped turn around a struggling startup through analytics, remarketing, and

coordinated multichannel acquisition. Generated $1.52 in revenue per $1 of marketing spend.

- $1.2M seed financing supported: category positioning, investor messaging, and go-to-market materials for an early-stage fintech company.

SYSTEMS I'VE ENGINEERED

AtmaOS (patent pending; in development). Cognitive operating system with persistent memory, specialized AI agents, coordinated reasoning, and shared operational state. https://atma.marketing/atma_os.html

Boswell Engine (patent pending; built, ongoing development). AI-powered account-based marketing and relationship intelligence: prospect research, behavioral analysis, psycholinguistic profiling, and AI-assisted message engineering. https://boswell.atma.marketing/

Bayesian Statistical Platform (proprietary; built, ongoing development). Python-based Bayesian inference for advertising decisions when data is incomplete, noisy, or uncertain. https://www.viceandvariance.com/bayesian-marketing.html

Dual-Engine Compliance System (proprietary; built, ongoing development). 43,000-line AI project for dual-pass review of financial marketing communications, with structured evidence evaluation and regulatory rule checking. A decision-support tool, not a substitute for legal or compliance professionals. https://portfolio.atma.marketing/

Ernest-Faulkner Engine (patent pending; built, ongoing development). Editorial judgment engine with ten competing editorial forces, fifteen failure modes for writing, 120 gold-standard editorial tests, and 30 context-reversal tests. https://atma.marketing/ernest-faulkner.html

Edge Hunter (patent pending; built, running full-time). AI intelligence engine that decodes Polymarket and Kalshi contracts, exposes hidden pricing contradictions, and identifies opportunities the crowd has not spotted.

Also built: JobBot 2.0 (AI-assisted employment research and application workflow) and Assumption Annihilator (structured evaluation of business assumptions and startup risks).

TECHNICAL CAPABILITIES

Software Engineering: Python, TypeScript, JavaScript, SQL, React, FastAPI.

AI Application Engineering: Multi-Model Orchestration, AI Agents, RAG, Context Engineering, Structured Outputs, Tool Calling.

Data & Decision Systems: PostgreSQL, Vector Search, Bayesian Inference, Statistical Modeling, Analytics.

Deployment & Reliability: Docker, GitHub Actions, Cloud Deployment, Automated Testing, Evaluation.

Marketing & Analytics Platforms: GA4, PostHog, Mixpanel, Amplitude, Looker, HubSpot, Salesforce, Meta Ads, Google Ads, LinkedIn Ads, Webflow, Figma. I also work with APIs and SDKs to build custom integrations, reporting systems, and automation.
